

Connecting the world to China

TrueCONNECT™ EXPRESS

Speedy Provision VPN with IPSec Encryption

TrueCONNECT™ EXPRESS

► Benefits ◀

- ▶ One Region, One Network Solution
- ▶ Fully Meshed Topology
- ▶ Secure
- ▶ Reliable, Resilient and High Quality
- ▶ Optimization of Resources and Cost-Effective
- ▶ Utilization of existing Internet connection for speedy provision
- ▶ Network security with IPSec encryption
- ▶ Scalable
- ▶ 24 x 7 Network Management

TrueCONNECT™ EXPRESS is a network-based IP VPN service that offers secure connection between multiple client sites over existing Internet connections and CPCNet's MPLS backbone at an affordable price.

Cost Effective

With managed IP VPN services, you can optimize the network for different business applications, such as email, Intranet, Extranet and ERP. TrueCONNECT™ EXPRESS is an ideal and cost-effective solution with high flexibility to be customized in order to accommodate your business needs. You will realize savings because of faster network configuration and better client management.

Scalability for Site Expansion

TrueCONNECT™ EXPRESS is a network-based solution and it is easy to add new sites as well as extra bandwidth, ranging from 128kbps to 1Mbps to meet different customer requirements.

Network Security with IPSec Encryption

Network security is maintained by employing Internet Protocol Security (IPSec) standard. IPSec supports

One
Region
One
Network

authentication and encryption to ensure secure transmission of data.

Centralized Management

Riding on TrueCONNECT™ EXPRESS, corporate software and IT infrastructure can be shared among regional operations. This centralized platform helps corporations to better manage IT resources as well as reduce investment for technical support in remote branches.

Easy to Manage

With real-time MRTG traffic report, IT managers can gain access to network performance data through a password protected website.

Instant and Fully Meshed Connectivity

Fully meshed connectivity is achieved among different sites connecting to TrueCONNECT™ EXPRESS service, with each node utilizing only one single VPN tunnel.

Your trusted communications and security solution provider

Connecting the world to China

TrueCONNECT™ EXPRESS

▶ Who should use ◀

- ▶ Companies with two or more offices in China, Hong Kong and overseas
- ▶ Companies which would like to build up close and flexible network communications between offices
- ▶ Companies without an existing WAN network, but with many remote sites that require a meshed network
- ▶ Companies which value security, cost-effective and efficient operations

Round-the-clock Support

CPCNet provides 24 x 7 professional network monitoring system support. Telephone and email consultation are available for fault reporting and technical assistance.

Global Reach Network

TrueCONNECT™ EXPRESS can be incorporated with your existing Internet connection. The service coverage includes China and Hong Kong. It is expandable to major cities worldwide.

If you are looking for a cost-effective, secure and flexible alternatives to private leased network...

TrueCONNECT™ EXPRESS is your best choice

TrueCONNECT™ EXPRESS utilizes CPCNet's MPLS Network as the backbone for service provisioning.

With TrueCONNECT™ EXPRESS, you can enjoy the benefits of a high-performance, secure private network as well as the flexibility, scalability, redundancy and lower costs offered by local Internet access, as an alternative to dedicated local leased connections. It is a carrier grade backbone to enhance business communications efficiency, which in turn helps you create new business opportunities in today's competitive markets.
